

Support Revolution for Oracle PeopleSoft

BENEFITS

- Continuity of PeopleSoft support without unneeded upgrades
- Significant cost savings vs. returning to Oracle
- Complete PeopleSoft portfolio support back to 7.5
- Comprehensive security remediation
- Support for customisations
- Fast response and resolution SLAs
- Assigned Primary Support Engineers and Account Managers

Software Support Overview

As a major third-party support provider has elected to wind down its support for PeopleSoft support, Support Revolution stands ready to fill the gap with long-lasting and personalised support solutions. Our commitment to delivering tailored support ensures that organisations can maintain their PeopleSoft systems effectively without the constraints and costs of Oracle contracts. With a focus on customer satisfaction and expertise, Support Revolution empowers businesses to optimise their PeopleSoft operations while enjoying significant cost savings and dedicated service.

Challenges

PeopleSoft customers face significant challenges, including the decision by a third-party support provider to wind-down its support for PeopleSoft, forcing them back to costly Oracle contracts. This leads to unwanted system upgrades, high maintenance costs, and limited flexibility in support options. Additionally, slow response times for critical issues and a shortage of qualified personnel further complicate matters. Security concerns with older PeopleSoft versions and the complexity of integrating legacy systems with modern applications add to the difficulties, leaving organisations in a precarious position.

Support Revolution Solution

Support Revolution offers a lifeline to PeopleSoft customers that may no longer continue service with other third-party support providers, delivering scalable and personalised PeopleSoft support, including Tax, Legal and Regulatory (TLR) updates, without the need to return to costly Oracle contracts or undergo unwanted system upgrades. Our solution ensures continuity of support for existing PeopleSoft implementations while providing significant cost savings compared to Oracle. We tailor our services to meet specific client needs, extend support for legacy systems, and offer faster response times and binding resolution times! Additionally, we provide comprehensive security updates and compliance guidance, including older releases, enabling organisations to maintain their PeopleSoft systems effectively while redirecting resources towards innovation and growth initiatives. For Rimini Street PeopleSoft clients, we will conduct an analysis to ensure there is no unauthorised code lurking in Rimini patches, and remediate if necessary, prior to support for your protection.

From transition to go-live there has been only positive feedback on the service that was and is still provided
