- Security protection for any version
- Support for SAP Global Trade Services customisations
- Tax, Legal, and Regulatory updates for any release
- Fast response and resolution SLAs
- Assigned Primary Support Engineers and Account Managers

Software Support Overview

Support Revolution delivers scalable and personalised third-party support for SAP Global Trade Services (GTS), enabling organisations to optimise trade operations while significantly reducing support costs. Our independent support helps you maintain your current SAP GTS version, without forced upgrades. Support Revolution ensures your SAP GTS platform remains secure, compliant, and operational with world-class support. Our service also includes ultra-responsive SLAs, and Tax, Legal, and Regulatory updates. Experience cost savings of up to 90% compared to SAP support, backed by an expert team focused on your business continuity and long-term success.

SAP Global Trade Services Challenges

Compliance with global regulations, tariffs, and free trade agreements can be particularly daunting for organisations operating across multiple jurisdictions. SAP GTS, while feature-rich, can be complex and difficult to master. Ongoing maintenance requires considerable investment in both time and resources, and demands attention to detail and skilled personnel. Additionally, as SAP ends support for legacy GTS versions, organisations must also deal with potential risks of unsupported software, including security vulnerabilities, regulatory non-compliance, and integration challenges with modern systems.

Support Revolution Solution

Support Revolution provides comprehensive support for SAP Global Trade Services, allowing organisations to avoid forced upgrades and desupport deadlines. Support Revolution enables businesses to remain on their current SAP GTS release for as long as needed, without sacrificing compliance, security, or operational effectiveness. Clients benefit from binding resolution SLAs of two hours or less for critical issues, ensuring minimal disruption to global trade operations.

Support Revolution's support for customisations and Database Health Checks are included, helping to optimise system performance and resolve technical issues at no extra cost. Support Revolution offers a superior alternative for SAP GTS licensees seeking stability, compliance, and cost efficiency in their global trade operations, while significantly reducing their total support costs up to 90% compared to SAP and maintaining high service standards.

On 31 December, 2025, SAP will discontinue all mainstream maintenance and support for SAP GTS 11.0, including bug fixes, legal and regulatory updates, and critical security patches. Migrating to GTS E4H is complex and not a standard upgrade.

SAP GTS Support Programme Comparison
