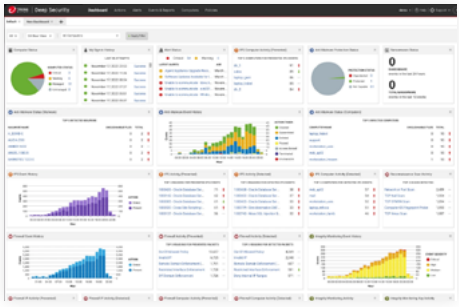
Revolutionary Enterprise Security

POWERED BY TREND MICRO

Revolutionary Enterprise Security provides advanced server security for physical, virtual, and Cloud servers. It protects enterprise applications and data from breaches and business disruptions without emergency patching. This comprehensive, centrally managed platform helps simplify security operations while enabling regulatory compliance and accelerating the ROI of your virtualization and Cloud projects.

Comprehensive Protection

- Multi-layered security across physical, virtual, and Cloud environments
- Intrusion prevention, malware prevention, web reputation, integrity monitoring, log inspection, and multi-platform application control
- Protection against unknown threats



Unified Management

- Single dashboard for managing security across diverse platforms
- Automated policy deployment and compliance reporting
- Compliance with regulatory requirements, including GDPR, PCI DSS, HIPAA, NIST, and FedRAMP

Easy to Deploy and Maintain

- Automatically detects new workloads
- No downtime or extensive regression testing
- Minimal performance impact

Support Revolution

Support Revolution
Comprehensive Security

Support Revolution offers comprehensive security solutions for Oracle, SAP, and VMware. We enable organizations to maintain a strong security posture without the need for costly upgrades or adhering to vendor roadmaps.

- Enterprise-grade security solutions are available, including Revolutionary Enterprise Security, Revolutionary Application Security, and Revolutionary Database Security
- Our Global Security Team delivers SAP (monthly) and Oracle (quarterly) security advisories on new threats that may affect you; we detail the severity and remediation recommendations
- Hardening guides are available at no additional charge to protect your systems from vulnerabilities
- Revolutionary Managed Security Services delivers enterprise-grade security that you don't have to manage and administer, giving you time to focus on projects that move the needle for your business
- Support Revolution can partner with you to implement security solutions and recommendations
- Analysis and implementation of custom security measures are available as required
- Assistance in maintaining application compatibility with modern security standards is available, ensuring uninterrupted connectivity and functionality with external partners

Support Revolution helps organizations effectively maintain their Oracle, SAP, and VMware software and reallocate budget and resources towards strategic initiatives by providing:

- **Significant cost savings** of up to 90% compared to vendor maintenance costs
- **Issue resolution** for all technical and functional aspects
- **Interoperability and integration support** ensures optimal functionality across your enterprise ecosystem
- **Fast response SLAs** of less than 10 minutes for critical issues
- **Binding resolution times** of less than 2 hours for critical issues
- **Assigned Primary Support Engineers and Account Managers** for personalized support
